E-CATALOG

(Catalog of Maps, Charts and Related Products)

Description and Background:

The E-Catalog is an electronic catalog of National Imagery and Mapping Agency (NIMA) products, which are distributed by the Defense Logistics Agency (DLA) Defense Supply Center-Richmond (DSCR). The catalog is designed to simplify access to product information previously found only in the NIMA hard-copy *Catalog of Maps, Charts, and Related Products*. The DLA Defense Logistics Information Service (DLIS) releases an E-Catalog monthly on compact disk.

Key Capabilities:

1. The E-Catalog runs on a personal computer, using a browser and the freely available ESRI ArcExplorer data viewer software.
2. The catalog identifies aeronautical, hydrographic, topographic and digital products issued by NIMA. National Stock Number, NIMA Reference Number, current edition number, edition date, Defense Supply Center Richmond (DSCR) stock status code, security classification, chart series, sheet, and geopolitical codes are included.

Current Status:

The current version is Volume 1, Number 2, released in May 2001. Monthly E-Catalog releases are planned. The catalog supports identification of available hardcopy and certain digital products, not ordering. MILSTRIP requisition continues as the ordering mechanism. Online ordering is being developed as a future enhancement.

Point of Contact:

- Requirements Branch, rbinfo@tec.army.mil
- DLIS Customer Support Center (dlis-support@dlis.dla.mil), 1-888-352-9333, DSN:932-4725.
